Who killed object 17?

A document can forget without losing its memory.

CURRENT STATEMENT / AMENDED

There was nobody here.

The current cross-reference points to this replacement.
The earlier statement has disappeared from the page.

Your case: recover the witness and explain the disappearance.

01 Find the final startxref offset.

02 Read its trailer. Follow /Prev.

03 Recover the earlier complete revision.

04 Compare object 17 in both revisions.

Win condition: explain what changed, with byte offsets as evidence.

Hint: saving an update can append new objects while retaining old bytes.
