PDF LAB / 07

The lock is the layers panel.

Three switches. One expression. No JavaScript.

A

B

C

Green means visible. Grey means the conditional paint is absent.

A AND (NOT B) AND C

Open the layers panel and find the combination. Inspect /VE to explain it.

AnyOn

AllOn

AnyOff

AllOff

These four controls use /P policies. The large gate uses /VE.

Its /P fallback is AllOn: a different answer exposes ignored expressions.

Same page stream in all eight fixtures; only default layer states change.

Layers hide paint, not secrets. Viewer controls require separate qualification.
