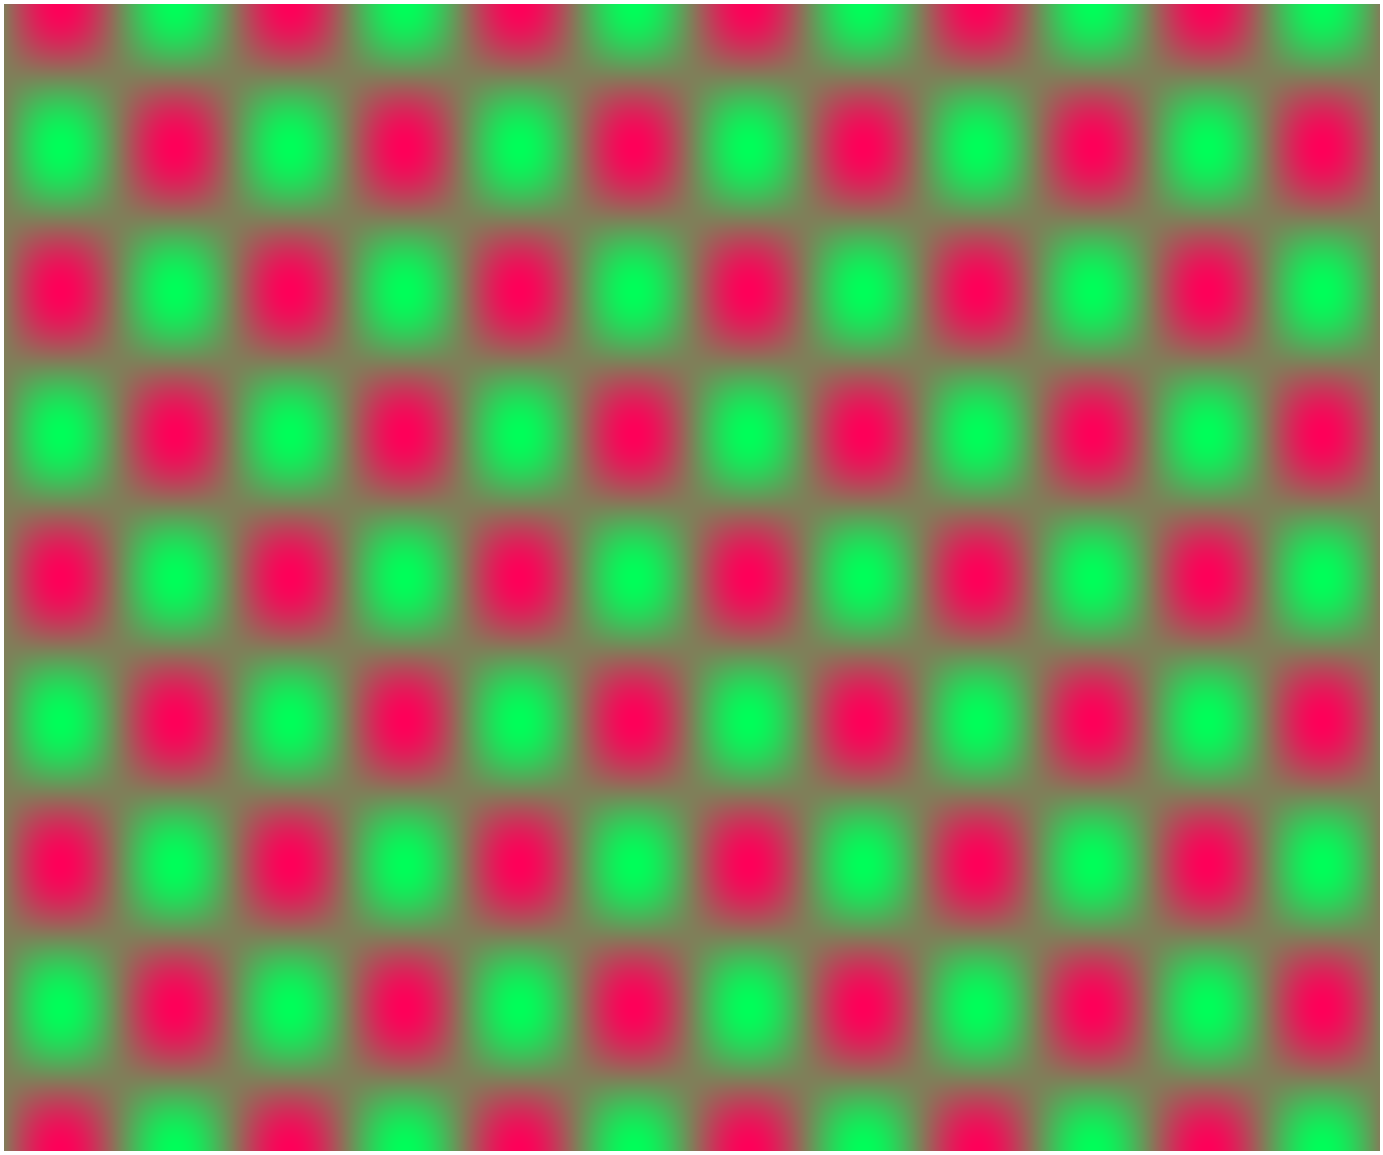
PDF LAB / 09

The colour is a program.

A tiny stack language computes the paint. No PDF JavaScript.



v = (sin(2160x) * cos(1440y) + 1) / 2 [angles in degrees]

RGB = (v, 1-v, 0.35). The page stores a function, not this pixel grid.

Inspect /FunctionType 4 and /ShadingType 1. Sampling belongs to the reader.
